

Biomedical Treatment for Autism, ADHD and related conditions

30 November 2013 | 9.30 - 5.00pm
Glendowie, Auckland

Understanding the science and putting it into practice to support your child's learning, behaviour and health.

Dr Leila Masson

A consultant paediatrician interested in disease prevention through healthy nutrition and lifestyle. **Topic:** How to improve the health and behaviour of children with ADHD or ASD by treating their medical problems. A scientific review and fast track course in biochemistry and nutrition.

Gina Wilson

Gina is an experienced naturopath, medical herbalist and nutrition consultant with an international client base. Her main focus is the nutritional management of behavioral disorders. **Topic:** Developing the best eating plans for children: Additive free, gluten/dairy free, GAPS, BED and beyond. Practical advice on the best diet for your child.

Dr Helen Smith

Having been in clinical practice for the past twenty years, Dr Helen has a wealth of experience in the medical and natural health field and has completed postgraduate studies in nutritional medicine. **Topic:** Keeping parents energised, healthy and mentally alert.

Parent Panel

Parents sharing what has worked for them, what they would do differently, what their next steps will be. Also guest panelist Gabby Hogg, an inspiring young lady with ASD, talking about her life.

Plus amazing exhibitors, prizes, fun, support, food and good times!

Cost Parents \$65, Professionals \$80

Including a plentiful, nutritious, exciting am and pm tea, organic coffee and tea. Please bring a packed lunch if you feel you will need more food.

Naturopath specialising in
health, learning and behaviour

Testimonial

*Dear Leila and Gina
I wanted to thank you both for the incredible course today. It is going to go down as one of the most ground breaking in my life - because I am going to overhaul the way we live. I learnt so much in a short space of time - everything just clicked into place when I heard you talk and my family is going to be so much healthier and happier as a result.*

DR. LEILA MASSON
M.D., MPH, DTMH, FRACP, FAAP, BCLC
